

# NEKTON®-Dog-H

Vitamin Supplement with High Percentage of Biotin

NEKTON-DOG-H not only has all the vitamins a dog generally needs for good health but, in addition, a high proportion of biotin (vitamin H).

What does this mean for your dog?

If your dog's coat is smooth and shiny, then our vitamin supplement NEKTON-DOG-V with its well-balanced formula will keep it that way. If, however, its coat is rough and brittle with unnaturally light patches or the skin dry and scaly, the extra biotin in NEKTON-DOG-H will help to correct these symptoms. NEKTON-DOG-H is the best answer to many skin and coat problems in dogs.

Biotin is involved in many of the body's metabolic reactions but very often not enough can be synthesized by the animals themselves. It is important, therefore, that biotin is included in the diet as it promotes growth, the synthesis of food and supports reproduction. Its main influence, however, is on the condition of a dog's skin and coat.

A biotin deficiency can also arise during treatment with antibiotics or sulfa drugs. The protein avidin found in raw egg white and turkey chicks binds dietary biotin and also renders it unavailable to the body.

A biotin deficiency can cause dull, brittle and dry hair, premature greying and even bald patches. Unhealthily pale and scaly skin can also be a sign of a biotin deficiency and severe cases result in eczema and itchy irritation.

NEKTON-DOG-H is a vitamin supplement with an extra supply of biotin to give your dog a full, shiny coat of hair.

## USAGE

Either crumble the daily dose into the dog's food or feed the tablet by hand. NEKTON-DOG-H tablets are tasty and are generally accepted by dogs without any trouble.

### Recommended Daily Dose:

¼ tablet daily for dogs up to 5 kilos (approx. 11 lb.) is quite enough.

½ tablet daily for dogs up to 10 kilos (approx. 22 lb.) body weight. Adjust accordingly for dogs of 10 kilos and above body weight. Each tablet weighs around ½ a gram.

The following table is intended as a guide to body weights.

### EXAMPLES APPROXIMATELY:

Yorkshire Terrier	5½	-	7 lb.
Dachshund	16½	-	19¾ lb.
Miniature Poodle	up to	-	6½ lb.
Poodle	up to	-	44 lb.
Fox Terrier	16	-	18¾ lb.
Cocker Spaniel	28½	-	30¾ lb.
Basset Hound	39½	-	44 lb.
Collie	50½	-	59½ lb.
Doberman Terrier	63¾	-	81½ lb.
Boxer	61½	-	66 lb.
German Shepherd Dog	70½	-	74¾ lb.

NEKTON-DOG-H is a special product intended for use in cases of damage and defects due to a biotin deficiency. Please consult your local vet if you suspect your dog's coat and skin defects are due to disease or parasites. If medical treatment is necessary NEKTON-DOG-H will help hair and skin growth and replacement.

If you have previously been giving your dog NEKTON-DOG-V, it is not necessary while you are using NEKTON-DOG-H as this has the same basic formula of vitamins.

## IMPORTANT

Keep NEKTON-DOG-H in a cool, dark and dry place. In an unopened container and correctly stored the vitamins in NEKTON-DOG-H remain effective until date of expiry, see extra label.

### Please note

Because of this supplement's higher content of vitamin D than in a complete feed, it may only be added to 3% of a dog's daily ration.

## INGREDIENTS

### Vitamins:

Vitamin A, Vitamin D<sub>3</sub>, Vitamin E, Thiamine, Riboflavin, D-Pantothenic Acid, Niacinamide, Vitamin B<sub>6</sub>, Folic Acid, Vitamin B<sub>12</sub>, Menadione, Biotin, Choline.

### Minerals/Trace Elements:

Calcium / Iron / Magnesium.

The effective substances in NEKTON-DOG-H have been chosen and blended and the dosage carefully calculated to produce the best results. Avoid any risk of overdosing by giving your dog the amount of NEKTON-DOG-H appropriate to its weight only and NO more.
